WORK EXPERIENCE

Hytera

London, UK

UX/UI Designer

Sept 2025 – Mar 2026

- Increased design delivery efficiency by 35% by managing 20+ concurrent product, web, and marketing design initiatives across European markets within Agile cross-functional teams.
- Improved design consistency across 6+ regions by developing scalable design systems supporting 50+ digital products.
- Reduced project turnaround times by 30% by partnering with product managers, engineers, and marketing stakeholders to streamline cross-functional design workflows and delivery.
- Enhanced stakeholder understanding of complex technical products by 25% by translating business requirements into intuitive, user-centered interface designs and visual experiences.
- Supported end-to-end product design by aligning user needs, usability goals, and responsive design standards.

Building Blocks

London, UK

UI Designer

Apr 2023 – June 2024

- Increased user engagement by 25% by designing responsive, accessible SaaS interfaces that improved usability across desktop, tablet, and mobile applications.
- Reduced friction across end-to-end customer journeys by improving task completion rates by 18% through user research, customer journey mapping, wireframes, user flows, and interactive prototypes.
- Improved accessibility compliance by 20% by implementing WCAG standards, responsive design principles, and scalable interface patterns across core platform features.
- Reduced development revisions by 30% by delivering high-fidelity prototypes, reusable design system components, and developer-ready specifications that streamlined implementation.
- Delivered 3 product releases by partnering with cross-functional teams from discovery through launch.

Solace

London, UK

Senior Visual Designer (Digital Product Design & UX)

Aug 2022 – Apr 2023

- Increased digital engagement by 34% by designing responsive web experiences and user-centered interfaces that improved usability and customer interaction across digital touchpoints.
- Improved design consistency across 3 global regions by developing scalable design systems, digital guidelines, and reusable UI patterns supporting cross-functional product initiatives.
- Managed 15+ concurrent design initiatives by partnering with product, engineering, and marketing teams to deliver user-focused digital experiences within project timelines.
- Simplified complex cybersecurity concepts into intuitive, accessible user experiences, improving stakeholder comprehension and adoption through user-centered design.
- Supported product and marketing initiatives by translating business requirements into responsive interface designs aligned with usability standards, accessibility best practices, and customer experience goals.

Department of National Defence – Director General Defence Security (DGDS)

Ottawa, Canada
